

National Data Lake EVD — Bronze, Silver, Marts and Gold Mapping

Architecture Principle	Bronze	Silver	Marts Facts
Facts and dimensions reside in the marts folder; Gold contains reporting models.	Raw ingested source structures	Cleaned and standardized integration models	Business-event facts

Layer Flow
Traveller
Case & contacts
Laboratory Treatment

Business-pathway			
Pathway	Detection	Link to facility	CIF
Health facility	EMR screening	Flagged patient linked to health facility	CIF administered in ADAM(as of now, to be updated to Facility EMR)
Traveller	ADAM or UHAI traveller screening	Normal or flagged passenger; flagged passenger linked to health facility	CIF administered in ADAM at health facility
Community	Community alert from m-Dharura/eCHIS/CBS	Alert verified, escalated and linked to health facility	CIF administered in ADAM at health facility
Contact tracing	Contact registered/monitored in ADAM	Symptoms detected and contact linked to health facility	CIF administered in ADAM at health facility

--	--	--	--

Marts Dimensions	Gold Reports	Current Scope	Important Business Rule
Conformed analytical dimensions	Dashboard-ready reports	Traveller, case investigation, contacts, laboratory and treatment outcomes	Recovery/death occurs after ETU treatment, not during laboratory testing.

Bronze	Silver	Marts	Gold
adam_travellers_raw / uhai_raw	slv_adam_travellers / slv_uhai_cases	fct_screening + dimensions	report_screening
adam_cases_raw	slv_adam_cases	fct_case_investigation / fct_contact_registration	case and contact reports
lims_raw	slv_lims_results	fct_lab_result + lab dimensions	report_lab_result
adam_cases_raw (interim)	slv_adam_cases (interim)	fct_treatment_outcome	report_treatment_outcome

Classification	Laboratory	Treatment	Outcome
Suspected / probable / no case	Lab testing	ETU treatment if confirmed/probable	Recovery / death after ETU
Suspected / probable / no case	Lab testing	ETU treatment if confirmed/probable	Recovery / death after ETU
Suspected / probable / no case	Lab testing	ETU treatment if confirmed/probable	Recovery / death after ETU
Probable or no case	Lab testing where indicated	ETU treatment if confirmed/probable	Recovery / death after ETU

Bronze → Silver Model Mapping

Bronze Model	Silver Model	Status
adam_cases_raw	slv_adam_cases	Implemented
adam_travellers_raw	slv_adam_travellers	Implemented
uhai_raw	slv_uhai_cases	Implemented
lims_raw	slv_lims_results	Implemented
cbs_raw	slv_community_alerts	Planned
echis_raw	slv_community_alerts	Planned
mdharura_raw	slv_community_alerts	Planned

Transformation / Business Purpose

- Case investigations and contact registrations from ADAM
- ADAM traveller screening records
- UHAI traveller/case surveillance records
- Laboratory result feed; LIMS represents the lab data interface, while the laboratory is the business actor
- Community event-based surveillance alerts
- Community signals raised and verified through eCHIS
- m-Dharura community alerts, verification and investigation

Silver → Marts Facts Mapping

Silver Model	Marts Fact	Status
slv_adam_travellers	fct_screening	Implemented
slv_uhai_cases	fct_screening	Planned
slv_adam_cases	fct_case_investigation	Implemented
slv_adam_cases	fct_contact_registration	Implemented
slv_lims_results	fct_lab_result	Implemented
slv_adam_cases	fct_treatment_outcome	Interim
slv_community_alerts	fct_community_alert	Planned

Loading Rule / Business Purpose
Traveller pathway; normal or flagged passenger
Traveller pathway; normal or flagged passenger
Filter record_type/type = case; CIF completed at health facility
Filter record_type/type = contact; contact tracing is currently in ADAM
One laboratory test/result record; includes requesting facility and testing laboratory
Current outcome feed; recovery/death should ultimately originate after ETU treatment, not from laboratory testing
Alert escalated and linked to a health facility before CIF is completed in ADAM

Dimension Source and Lineage Mapping

Source / Generator	Marts Dimension	Status
Generated calendar	dim_date	Implemented
Generated epidemiological calendar	dim_epiweek	Implemented
facility_list_dump_20260528	dim_facilitylist	Implemented
slv_lims_results	dim_labtest	Implemented
slv_lims_results	dim_laboratory	Implemented
slv_adam_travellers + slv_uhai_cases	dim_point_of_entry	Implemented
slv_adam_travellers + slv_uhai_cases	dim_location	Review

Purpose
Conformed calendar dimension
Conformed epidemiological week dimension
Master facility list
Distinct test code, test name and specimen type
Testing laboratory code and name
Conformed points of entry across traveller systems
Current diagram contains POE-level location only; review overlap with dim_point_of_entry

Marts → Gold Reporting Mapping

Marts Inputs	Gold Report
fct_screening + dim_date + dim_epiweek + dim_point_of_entry	report_screening
fct_case_investigation + dim_date + dim_epiweek + dim_facilitylist	report_case_investigation
fct_contact_registration + dim_date + dim_epiweek	report_contact_registration
fct_lab_result + dim_date + dim_labtest + dim_laboratory + dim_facilitylist	report_lab_result
fct_treatment_outcome + dim_date + dim_epiweek	report_treatment_outcome
Multiple marts facts and reports	report_surveillance_summary
fct_community_alert	report_community_surveillance
Future EMR screening fact	report_facility_surveillance

Status	Dashboard / Business Purpose
Implemented	Traveller surveillance dashboard report
Implemented	Case investigation dashboard report
Implemented	Contact registration/monitoring report
Implemented	Laboratory investigation report
Implemented	Treatment outcomes; recovery/death occur after ETU treatment
Planned / not in diagram	Integrated executive surveillance summary
Planned	Community alerts and referral performance
Planned	Facility-based syndromic screening

End-to-End Surveillance Pipeline Mapping

Pathway	Bronze Input	Silver Model
Traveller	adam_travellers_raw	slv_adam_travellers
Traveller	uhai_raw	slv_uhai_cases
Case investigation	adam_cases_raw	slv_adam_cases
Contact tracing	adam_cases_raw	slv_adam_cases
Laboratory	lims_raw	slv_lims_results
Treatment outcome	adam_cases_raw (interim)	slv_adam_cases (interim)
Community	cbs_raw / echis_raw / mdharura_raw	slv_community_alerts
Facility screening	Future EMR raw tables	slv_emr_screening

Marts Fact	Supporting Dimensions	Gold Report
fct_screening	dim_date; dim_epiweek; dim_point_of_entry	report_screening
fct_screening	dim_date; dim_epiweek; dim_point_of_entry	report_screening
fct_case_investigation	dim_date; dim_epiweek; dim_facilitylist	report_case_investigation
fct_contact_registration	dim_date; dim_epiweek	report_contact_registration
fct_lab_result	dim_date; dim_labtest; dim_laboratory; dim_facilitylist	report_lab_result
fct_treatment_outcome	dim_date; dim_epiweek	report_treatment_outcome
fct_community_alert	dim_date; dim_epiweek; location/facility dimensions	report_community_surveillance
fct_facility_screening	dim_date; dim_epiweek; dim_facilitylist	report_facility_surveillance

Status	Business Notes
Implemented	Passenger may be normal or flagged. Flagged passenger is linked to a health facility for CIF in ADAM.
Implemented	Conformed with ADAM traveller records in a single screening fact.
Implemented	CIF is currently administered in ADAM at the health facility.
Implemented	When symptoms are detected, the contact is linked to a facility and a CIF is administered in ADAM; result is probable or no case.
Implemented	Laboratory testing is a business function; the testing laboratory is captured separately from the requesting facility.
Interim	Recovery/death occurs after ETU treatment. Replace interim source when ETU clinical outcome data becomes available.
Planned	Alert is verified and escalated, linked to a health facility, then CIF is administered in ADAM.
Planned	EMR currently creates screening record only; formal CIF remains in ADAM until implemented in EMR.

Mapping Notes, Corrections and Assumptions

Topic	Decision
Layer placement	Facts and dimensions are in marts; Gold contains reports.
Traveller systems	Current traveller surveillance is ADAM and UHAI.
Contact tracing	Current contact monitoring/tracing is ADAM only.
Health facility CIF	Flagged traveller, escalated community alert or symptomatic contact is linked to a health facility where CIF is administered in ADAM.
Laboratory role	Laboratory is the business actor; a LIMS/data interface is only the technical feed.
Treatment outcome	Recovery/death occurs after ETU treatment.
Community models	Bronze community tables exist, but corresponding silver/fact/report models are planned.
Field naming	Draw.io diagrams contain some older names such as identifier_number/facility_mfl.

Impact on Mapping

Workbook separates Marts Facts, Marts Dimensions and Gold Reports.

Both silver models feed fct_screening and report_screening.

slv_adam_cases contact records feed fct_contact_registration.

Case investigation is modelled separately from the original detection event.

fct_lab_result contains requesting facility and testing laboratory keys.

Outcome should not be interpreted as a laboratory-stage event.

Planned rows are included without pretending they are implemented.

Inventory preserves diagram names; mapping sheets describe intended business role.

Follow-up

Use these folder names in dbt documentation and deployment.

Apply cross-system deduplication when a traveller appears in both systems.

Add a follow-up fact when daily monitoring fields become available.

Retain origin pathway/reference fields for linkage.

Maintain dim_laboratory from testing lab code/name.

Replace interim ADAM-derived outcome with ETU clinical data when available.

Confirm unified slv_community_alerts schema.

Reconcile against current dbt SQL before final production sign-off.
